CONNECTING YOUR BUSINESS TO THE EVENT RESOURCES YOU NEED

The **very best equipment** can only broadcast as good a message as the interpreter speaks. To accomplish optimal results, interpreters need to find professional tools to properly hear, as well as route pro-sound quality to the right output channel, addressing the proper language group every time.

Developed by ProLingo for the U.S. market, the ProLingo interpreter control unit makes sure every word is heard.

PROLINGO PROVIDES TOTAL INTERPRETATION SOLUTIONS

INTERPRETER STAFFING SOLUTIONS

ProLingo is the only firm with a full time **INTERPRETER COORDINATOR** dedicated to team selection, content preparation, and quality control.

- Local resources of proven “preferred interpreter teams”
- Standardized qualification process with 10-year track record
- FTP site for preparation document exchange
- Full cost disclosure on every quote – no hidden fees
- Highest talent quality and value
- Government and executive level business etiquette
- AIIC, Department of State, DoD, UN, and International Linguistic Accreditation

Assisted Listening Solutions

Regardless of the cause, hearing loss can make it difficult for people to understand the message being delivered. That in turn can cause individuals to stop attending public events due to the difficulty they have in comprehending what is being said.

Don't leave members of your church congregation or participants at your community meetings struggling to hear. ProLingo has portable listening devices to rent or buy. These state-of-the-art products are specifically designed to overcome distortion from background noise and poor room acoustics. By amplifying the sound signals, we guarantee your message will be delivered with excellent sound quality.

- Since 1999, ProLingo's portable equipment has become the new benchmark of small and large events with interpretation and assisted listening solutions for schools, churches and meetings throughout the world.
- Most churches and schools need a great sounding and easy-to-use wireless interpretation setup without the need for a sound booth or a technician.
- The ProLingo digital interpretation system is the proven solution for any church or school event with interpretation, and community events. This system works, and it is available at the most affordable rental or purchase rates.
- Join hundreds of customers – among them houses of worship, schools, community groups, corporations, freelance interpreters, tour guides, and many others – who are already deploying this fantastic system to enhance communication with foreign-language families. No technical training or expertise is required.
- We offer different portable and stationary systems which we have available for demonstrations at your convenience. We also specialize in assistive listening devices for the hearing impaired and can support you to fulfill the ADA compliances. Please call us for further information about the ADA guidelines.

ProLingo Conferencing Systems

From small boardroom discussions to large general sessions, we can accommodate any number of Push-to-Talk microphones and power control units to accomplish a seamless setup in a matter of minutes. With superb-sounding audio and a very professional look, our conference microphone systems offer numerous features to include:

- **Contemporary Conferencing Equipment**

Promote interactive discussions among attendees while allowing the chair to control the delivery and flow of the event. Our conference mic systems are equipped with an illuminating red light ring that is activated when the microphone is switched on, providing excellent visual reference for the attendees to immediately identify who is talking in the group.

- **Push to Talk in Minutes**

Efficient setup minimizes technical staff needs and eliminates a multitude of expensive technical components, resulting in significant savings while achieving a truly contemporary conferencing solution.

- **Multiple Table Microphone Setup**

The true benefit of a ProLingo conferencing system is that all involved microphones connect to each other in a daisy chain fashion. This enables a quick setup and strike and reduces the traditional mega-board setup to one single input to control the volume once for all.

- **ProLingo**

Fair Price Guarantee

ProLingo's worldwide buying power allows us to pass along great savings to you with the most efficient results anywhere in the world.
